

Steel installation for fabricators - delivered with technical, operational and commercial control.

Your site delivery partner for structural and secondary steelwork. OP Steel supports steel fabricators with installation gangs, site supervision, technical and buildability support, and commercial control for site delivery.

You retain the client relationship and control of the steelwork package. OP Steel takes responsibility for delivering the site installation.

INSTALLATION GANGS

Site teams supplied with van and standard tools.

MANAGED INSTALLATION

Supervision, sequencing and controlled delivery.

TECHNICAL SUPPORT

Buildability input aligned with how steel is installed.

COMMERCIAL CONTROL

Progress, dayworks, variation and disruption records.

What we provide

01

Installation gangs

Experienced teams for controlled installation of structural and secondary steelwork.

- van and standard tools
- steel erectors and fitters
- primary and secondary steel
- metalwork installation

02

Site supervision

Managed installation support for live, constrained and programme-sensitive sites.

- site supervisors and foremen
- installation sequencing
- daily coordination
- project-based support

03

Technical & buildability

Practical support between fabrication information and site reality.

- buildability reviews
- drawing and interface queries
- BIM/detailing support
- technical coordination

04

Commercial control

Site records captured and shared promptly with your office.

- progress records
- signed dayworks
- variation evidence
- delay/disruption records

Where OP Steel adds value

We help fabricators reduce the gaps that create site delays, rework and margin exposure.

- installation delivery without competing for the fabrication package
- clear site records to protect commercial position
- early capture of technical issues and buildability risks
- coordination between drawing office, fabrication and site
- site supervision that protects programme and workmanship
- flexible installation capacity without permanent site payroll

Leadership credibility

Led by steelwork professionals with international steel construction, EPC/EPCM, BIM coordination, erection planning, commercial/contracts and fabrication-yard engineering experience.
